

CL3-CAM Professional 5 Speed Lathe

The CL3 is a tried and tested design and has found its place in many professional workshops. It features five speeds, a heavy head and tailstock and solid steel polished chrome bars for weight and rigidity, but the real heart of this machine is its phosphor bronze bearing. This adjustable tapered bearing gives far more support than ball races enabling bowls up to 30" in diameter to be turned with ease. The 3/4 hp motor powers through even the most arduous tasks, enabling deeper cuts to be made and speeding up some of the more laborious tasks such as roughing and scraping. This a heavy smooth running lathe which enjoys legendary status throughout the woodturning world.

RRP £499.99

Headstock The headstock is now made from cast steel for extra strength. The phosphor bronze bearing offers long life, unrivalled support and is adjustable to offer years of reliable performance.

Capacity 12" bowl capacity over bed, 30" with headstock swivelled.

What They Say...

"The introduction of these latest improvements has certainly lifted the lathe clear of the competition, and I particularly like the fact that you can upgrade an existing machine."

Value ★★★★★

Performance ★★★★★

The Woodworker & Woodturner

"Between centres the CL3 is very good indeed on both small and large work ... of course work up to 12" can be turned over the bed, the bowl-turning attachment is worth buying. The CL3 has a five year warranty and ... gives you a lot for your money when compared to some other lathes, which offer similar features for hundreds of pounds more."

Woodturning

SPECIFICATIONS

MAXIMUM BOWL DIAMETER: 762 mm (30")	MAXIMUM SWING OVER BED: 305 mm (12")	THREAD: 3/4 x 16 TPI
MAXIMUM BETWEEN CENTRES: 914 mm (36")	SPINDLE SPEEDS: 425, 625, 925, 1360 & 2000 rpm	TAPER: 1 Morse Taper
MOTOR: 3/4 hp		WEIGHT: 86 kg
		SIZE: H386 x W1625 x D381 mm

Shown with optional RPLB24-48 Stand.

Bed Bars The solid steel chromed bed bars add weight, rigidity and strength while providing smooth travel for head, tail and toolrest banjo.

Massive Capacity With a 36" capacity between centres and the ability to turn up to a 30" bowl when using the optional CL3/B all your turning needs can be catered for.

Tailstock Heavy duty tailstock within a cast iron construction gives stability and support to the workpiece. It is hollow to enable easy ejection of centres and allow for long hole boring and also features easy to use cam locks.

Cam Action Banjo and Tailstock Strong cast banjo and tailstock for easy one-handed repositioning.

OPTIONAL FITMENTS

CL3/B Bowl Turning Attachment
Eases the turning of bowls and allows larger capacities to be achieved. Can be used on a bench or stand. Includes CWA180 tubular bowl rest.
RRP £89.99

CLO/H 17" Tool Rest
For use when turning long spindles, because of its increased length the user doesn't need to move the banjo up and down the bed bars as often. Please note an additional banjo assembly is required to use this toolrest.
RRP £29.99

RPLB24-48 Adjustable Lathe Stand
The RPLB24-48 has been specifically designed to add great support to your turning. The splayed legs and steel construction gives rigidity, enabling large projects to be undertaken.
RRP £159.99

CONSUMABLES

RPSO-100 100 ml Spindle Oil
Bonds to the spindle & bearing, providing smooth running.
RRP £12.99

SPARES

CWA170 3/4" x 16 TPI Thread Protector
RRP £14.99

UPGRADES

CL/C Cam Lock Tool Rest Upgrade
Upgrade your lathe with a new cam lock banjo for easy adjustment along the bed bars.
RRP £39.99

VSLK Variable Speed Upgrade
This unit replaces the motor on your lathe to upgrade it to a 1hp machine with electronically controlled variable speed, making it the same speed as a CL4.
RRP £529.99

OPTIONAL ACCESSORIES

CLO/J 10" Tool Rest
Cast iron replacement 10" toolrest. For use with all CL-CAM series lathes and CL3B bowl rest.
RRP £19.99
