

BM16 Sliding Table Morticer

The BM16 is a compact bench mounted morticer, introducing new levels of accuracy, ease of use and industrial features at an affordable price.

The table is finely ground cast iron and moves smoothly and effortlessly front to back and side to side on machined dovetail slides. To ensure unsurpassed accuracy, the slides are fully adjustable using the easily accessible gib strips. An important feature of the table is the heavy and solid clamp, the likes of which are usually only seen on more industrial machines, which holds workpieces extremely securely, ensuring no movement during operation. The clamp is also repositionable, allowing a wide range of timber sizes to be accommodated.

Movement of the chisel is similarly smooth and accurate, with a gas spring and dovetail slides, which feature adjustable gib strips, allowing cuts to be made with ease and precision.

To further increase accuracy and speed of use, the BM16 also features sideways movement stops as well as vertical movement stops. These stops allow the depth and width of mortices to be set in order to achieve consistent results again and again.

RRP £299.99

What They Say...

"The machine in general is heavy for its size and certainly feels robust. The sliding bed is rigid and has the capacity to hold stock in place firmly...The sliding bed mechanism has plenty of adjustment to maintain smooth and accurate running, with all the components easily accessible. This morticer has all the features of a much larger floor mounted machine."

Furniture & Cabinet Making

"As an entry-level morticer, it's well worth a look... With its 16 mm capacity you can do some heftier joinery if needed, although its smaller footprint lends it better to smaller joinery and cabinetry work, and in that instance, a very capable machine with solid construction, plus the usual five-year warranty for additional piece of mind."

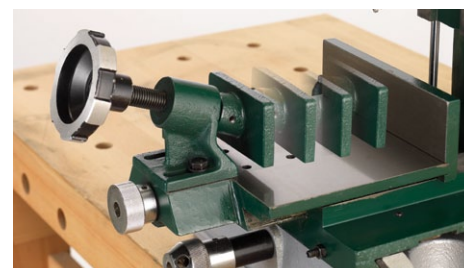

Good Woodworking

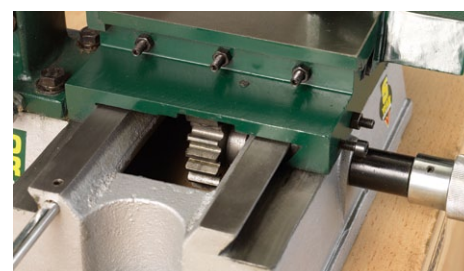

Adjustable Gib Strips Are fitted to the column and the tables in both forward/reverse and lateral movement systems. Also features locking bolts when the table needs to be kept securely in one position.

Gas Springs Provide smooth movement and help the headstock return to position.

Cast Iron Clamp With 3 sets of holes in the table and slots on the clamp base a wide range of positions can be set to accommodate different widths of workpiece.

Sliding Table A rack and pinion system provides easy lateral movement and features machined dovetail slides for accuracy.

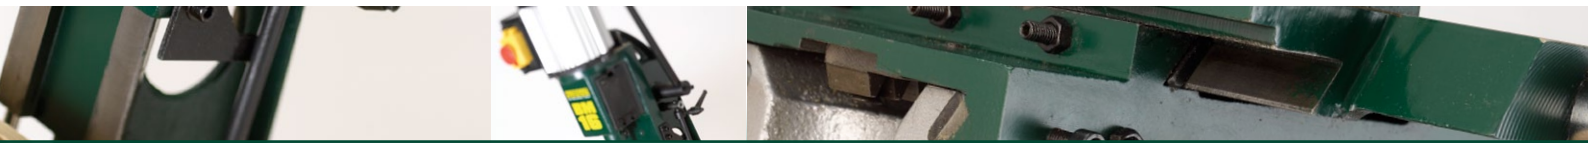

OPTIONAL ACCESSORY

R150-3CB Mortice Chisels and Bit Set
This set is made up of 1/4", 3/8" and 1/2" chisels and bits. The three most popular sizes from the R150 series and is packed in a convenient carry case.
RRP £59.99

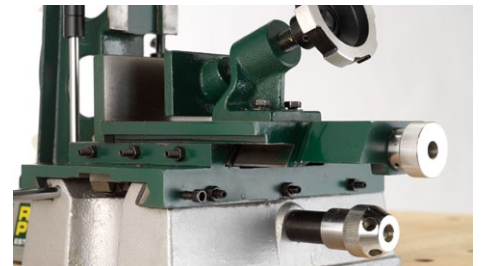

SPECIFICATIONS

MAXIMUM WORKPIECE HEIGHT: 120 mm	MAXIMUM CHISEL STROKE: 70 mm	TABLE SIZE: 180 x 157 mm
MAXIMUM WORKPIECE DEPTH: 130 mm	CHUCK CAPACITY: 13 mm	MOTOR: 1/2 hp
	CHISEL CAPACITY: 6 - 16 mm	WEIGHT: 46 kg
		SIZE: H700 x W270 x D300 mm

Easy Access The chuck is easily accessible from the side of the headstock making changing the bits a quick and simple procedure.

Movement Stops Vertical and horizontal stops allow for consistently accurate and repeatable cuts to be made.

Precision Adjustment Front to back and side to side movement are controlled with two separate handwheels, precision engineered for optimum accuracy.

Shown with chisel and bit (not included).
