

SM100 Spindle Moulder

A spindle moulder opens up a vast array of possibilities and their versatility is not to be underestimated. The SM100 is capable of a myriad of tasks, from fast and accurate repeat joinery to beautiful, highly detailed moulding. This heavily built machine brings professional joinery within reach of the serious home user and will make a great contribution to a home joinery or cabinet making workshop.

RRP £1299.99

	SIZE: H1240 x W480 x D750 mm

What They Say...

"The hood has a hefty hinged lid for easy adjustment and cutter block access...the spindle hardly broke a sweat taking full profile cuts as well as a pretty chunky rebate in a single pass...This is certainly a good model for the workshop...it's a compact and powerful machine, solidly built throughout...Plus, of course, it comes with the standard five-year Record Power warranty"

Good Woodworking

Micro Adjustment Both the standard and optional fences feature micro adjustment.

Planing Capability The fences are independently adjustable, allowing for full face planing cuts to be made; a useful function when preparing timber for shaping. (Optional safety finger fence - but standard fence is also independently adjustable).

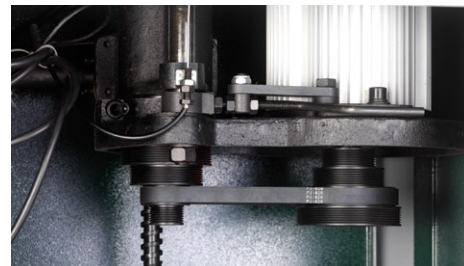

Four Speeds The machine has four speeds to cope with different diameters and types of tooling, as well as sanding if needed. For safety, indicator lights confirm which speed the machine is set on.

SANDING BOBBIN

Included

Powerful Motor The large 3.5hp motor provides an abundance of power and can handle thick stock with ease.

Shown with optional SM100/F Safety Fence.

Spindle Tooling
